Hiring Manager
San Francisco, CA

Dear Hiring Manager,

I am writing to apply for a Research Associate or laboratory technician position with your team. I hold a B.S. in Chemistry from UC Santa Cruz (2011), with bench experience in HPLC and chromatographic purification, NMR and UV-Vis characterization, sample preparation and extraction, and QC documentation under GLP, gained at Threshold Pharmaceuticals, MicroConstants and Quintara Biosciences. I also have a peer-reviewed publication in the ACS Journal of Medicinal Chemistry (February 2011).

The common thread in those roles is repeatability: prepare the sample the same way every time, run the instrument within its checks, write down what happened, and flag anything out of specification before it becomes a result. I am comfortable with the unglamorous half of lab work - glassware, reagents, inventory, logs - and I keep records clean enough that someone else can pick them up without asking questions.

I am available for an interview at your convenience and can start on short notice. I am best reached at (707) 596-8503 or Brian.j1274@gmail.com. Thank you for your time and consideration.

Sincerely,
Brian
