job-72 - General Proximity - induced proximity medicines (OmniTAC engine)

Date: [Insert Date]

Hiring Manager
General Proximity - induced proximity medicines (OmniTAC engine)
135 Mississippi Street (MBC BioLabs, Potrero Hill), San Francisco, CA 94107

Dear Hiring Manager,

I am excited to apply for the Research Associate, Drug Discovery - Platform/Discovery team (LIVE; \$32-45/hr) at General Proximity - induced proximity medicines (OmniTAC engine) in San Francisco. I hold a B.S. in Chemistry from UC Santa Cruz (2011) with hands-on experience in Cell culture, aseptic technique, assay development & optimization, sample prep, data recording, fast learning.

Your posting emphasizes B.S./M.S. biology/biochemistry/molecular biology or related; mammalian cell culture + passaging + aseptic technique; assay development; deep small-molecule drug discovery interest.. My background directly aligns: at Threshold Pharmaceuticals I synthesized and purified organic compounds using NMR and HPLC; at MicroConstants I performed sample extraction, chromatography, and spectroscopic analysis; at Quintara Biosciences I followed GLP for sample preparation, data recording, QC, and equipment maintenance. I also have a publication in ACS Journal of Medicinal Chemistry (Feb 2011).

I live at 21st Ave & Judah St in the Inner Sunset and commute via N Judah Muni and SFMTA buses. Your location at 135 Mississippi Street (MBC BioLabs, Potrero Hill), San Francisco, CA 94107 is accessible via ZONE B/C - From 21st & Judah: N Judah eastbound to Embarcadero -> T-Third southbound to 22nd St/Mission -> walk east to 135 Mississippi St (short walk per the posting). ~45-60 min.. I have verified your official careers portal at <https://job-boards.greenhouse.io/generalproximity/jobs/5660523004> and will apply directly via <https://job-boards.greenhouse.io/generalproximity/jobs/5660523004> - Official Greenhouse board job-boards.greenhouse.io/generalproximity - apply to 'Research Associate, Drug Discovery' (job 5660523004).

My property management experience has strengthened my organizational, budget tracking, and compliance skills - valuable for lab inventory, documentation, and safety protocols. I am detail-oriented, collaborative, and eager to contribute to your team.

Thank you for considering my application. I would welcome the opportunity to discuss how my background in Cell culture, aseptic technique, assay development & optimization, sample prep, data recording, fast learning can support General Proximity - induced proximity medicines (OmniTAC engine). I am available for an interview at your convenience and can be reached at (707) 596-8503 or Brian.j1274@gmail.com.

Sincerely,
Brian

Match Score: 72% - Fit: Small-molecule drug discovery RA: designing/executing experiments, assay development & optimization, mammalian cell culture, sample handling, data analysis - 'industry experience is desirable, but ability to work hard and learn fast is more important' - genuine entry opening.

Verified: General Proximity - induced proximity medicines (OmniTAC engine) official site <https://job-boards.greenhouse.io/generalproximity/jobs/5660523004> - physical address 135 Mississippi Street (MBC BioLabs, Potrero Hill), San Francisco, CA 94107 - verified

Official Apply: <https://job-boards.greenhouse.io/generalproximity/jobs/5660523004> - Official Greenhouse board job-boards.greenhouse.io/generalproximity - apply to 'Research Associate, Drug Discovery' (job 5660523004)

Transit: ZONE B/C - From 21st & Judah: N Judah eastbound to Embarcadero -> T-Third southbound to 22nd St/Mission -> walk east to 135 Mississippi St (short walk per the posting). ~45-60 min.
