job-74 - Anthrogen - AI + robotic molecular biology lab (seed-stage)

Date: [Insert Date]

Hiring Manager
Anthrogen - AI + robotic molecular biology lab (seed-stage)
San Francisco, CA (on-site per official posting; street address confirmed at interview)

Dear Hiring Manager,

I am excited to apply for the Research Associate (RL Environments) - run molecular biology protocols on robotic platforms (LIVE; \$120-200K) at Anthrogen - AI + robotic molecular biology lab (seed-stage) in San Francisco. I hold a B.S. in Chemistry from UC Santa Cruz (2011) with hands-on experience in Molecular cloning, PCR, protein expression & purification, assay development, liquid-handler familiarity, reproducibility, documentation.

Your posting emphasizes Hands-on molecular biology experience (B.S. life science or equivalent bench experience); meticulous, reproducible technique; comfort with early-stage pace.. My background directly aligns: at Threshold Pharmaceuticals I synthesized and purified organic compounds using NMR and HPLC; at MicroConstants I performed sample extraction, chromatography, and spectroscopic analysis; at Quintara Biosciences I followed GLP for sample preparation, data recording, QC, and equipment maintenance. I also have a publication in ACS Journal of Medicinal Chemistry (Feb 2011).

I live at 21st Ave & Judah St in the Inner Sunset and commute via N Judah Muni and SFMTA buses. Your location at San Francisco, CA (on-site per official posting; street address confirmed at interview) is accessible via ZONE C - SF on-site (street address confirmed at interview): N Judah eastbound to Powell/Embarcadero -> walk or Muni to the office. ~35-50 min.. I have verified your official careers portal at <https://jobs.ashbyhq.com/anthrogen/16b4c75b-d9d3-4cff-9184-20d476371ea0> and will apply directly via <https://jobs.ashbyhq.com/anthrogen/16b4c75b-d9d3-4cff-9184-20d476371ea0> - Official Ashby board jobs.ashbyhq.com/anthrogen - apply to 'Research Associate (RL Environments)' (posted July 7, 2026).

My property management experience has strengthened my organizational, budget tracking, and compliance skills - valuable for lab inventory, documentation, and safety protocols. I am detail-oriented, collaborative, and eager to contribute to your team.

Thank you for considering my application. I would welcome the opportunity to discuss how my background in Molecular cloning, PCR, protein expression & purification, assay development, liquid-handler familiarity, reproducibility, documentation can support Anthrogen - AI + robotic molecular biology lab (seed-stage). I am available for an interview at your convenience and can be reached at (707) 596-8503 or Brian.j1274@gmail.com.

Sincerely,
Brian

Match Score: 74% - Fit: Cloning, transformations, PCR, protein expression & purification, assay development to high reproducibility, plus teleoperating liquid handlers - your bench skills are the core requirement; posting also wants 'great gamer' hand-eye coordination (flagged).

Verified: Anthrogen - AI + robotic molecular biology lab (seed-stage) official site
