University of California, San Francisco  
San Francisco, CA

Search Committee,

I am writing to apply for the Junior Specialist position at University of California, San Francisco. I hold a B.S. in Chemistry from UC Santa Cruz (2011), with bench experience in wet chemistry and research support from roles at Threshold Pharmaceuticals, MicroConstants and Quintara Biosciences, and a peer-reviewed publication in the ACS Journal of Medicinal Chemistry (February 2011).

The heart of your posting is steady bench throughput and documentation that holds up. That is close to work I have actually done: making up buffers and reagents, titration and pH work at the bench, designing experiments with the team, interpreting the data and writing it up and running HPLC and column purification and logging what each run showed. I am comfortable being the person who keeps a bench tidy, a record complete and a schedule kept. The last decade of running property operations on contract sharpened exactly that: inventory, vendor scheduling, compliance paperwork and receipts that reconcile.

I would welcome a short conversation and can interview at your convenience. I am available to start on short notice and can be reached at (707) 596-8503 or Brian.j1274@gmail.com. Thank you for your time and consideration.

Sincerely,  
Brian
