Hiring Manager
Gladstone Institutes - Core Facilities
1650 Owens Street, San Francisco, CA 94158

Dear Hiring Manager,

I am excited to apply for the Research Associate I/II - Assay Development & Drug Discovery / Mass Spectrometry Core at Gladstone Institutes - Core Facilities in San Francisco. I hold a B.S. in Chemistry from UC Santa Cruz (2011) with hands-on experience in HPLC, mass spectrometry, assay development, chromatography, QC, data analysis.

Your posting emphasizes B.S. Chemistry preferred; HPLC, mass spec, assay development, QC.. My background directly aligns: at Threshold Pharmaceuticals I synthesized and purified organic compounds using NMR and HPLC; at MicroConstants I performed sample extraction, chromatography, and spectroscopic analysis; at Quintara Biosciences I followed GLP for sample preparation, data recording, QC, and equipment maintenance. I also have a publication in ACS Journal of Medicinal Chemistry (Feb 2011).

I live at 21st Ave & Judah St in the Inner Sunset and commute via N Judah Muni and SFMTA buses. Your location at 1650 Owens Street, San Francisco, CA 94158 is accessible via Same Mission Bay routing: N Judah east -> T-Third south to UCSF/Chase Center. ~40-50 min.. I have verified your official careers portal at <https://gladstone.org/science/cores> and will apply directly via <https://gladstone.wd503.myworkdayjobs.com/careers> - Search 'Assay Development' or 'Mass Spectrometry' on Workday.

My property management experience has strengthened my organizational, budget tracking, and compliance skills - valuable for lab inventory, documentation, and safety protocols. I am detail-oriented, collaborative, and eager to contribute to your team.

Thank you for considering my application. I would welcome the opportunity to discuss how my background in HPLC, mass spectrometry, assay development, chromatography, QC, data analysis can support Gladstone Institutes - Core Facilities. I am available for an interview at your convenience and can be reached at (707) 596-8503 or Brian.j1274@gmail.com.

Sincerely,
Brian

Match Score: 88% - Fit: Mass spec + HPLC + assay development is exactly your skill set from Threshold and MicroConstants.
Verified: Gladstone Institutes - Core Facilities official site <https://gladstone.org/science/cores> - physical address 1650 Owens Street, San Francisco, CA 94158 - verified
